

Duratuf®

GUARDIAN RANGE

✓ Economical ✓ Simple to assemble ✓ Built to last

YOUR GEAR IN SAFEKEEPING

Available exclusively through

MITRE 10

duratuf.co.nz/guardian

When you invest in a Duratuf Guardian shed, you are investing in a New Zealand made quality product that you can rely on. Manufactured on home turf means that the product is suited to New Zealand conditions. Further to that, only the best of materials are used, from NZ grown timber through to premium hi-tensile steel and quality fastenings.

Keeping Kiwis in jobs plays an important role in our community and gives the added assurance of controlled quality during manufacture, coupled with a locally backed warranty - we'll be here if you need us!

TREATED TIMBER TOP & BOTTOM PLATE

Guardian sheds incorporate a treated 45 x 45mm timber plate top and bottom that locks together at the corners. As well as providing superior strength it creates an excellent platform to enable you to shelve out your shed, hang up your valuable gear and maximise your storage capacity.

STRONGER SEMI-TIMBER FRAME CONSTRUCTION

- Easy to build panel system
- NZ sourced treated timber
- Rigid frame structure

NZ MADE SUPERIOR QUALITY

- NZ owned and operated
- Keeping manufacturing local
- Monitored quality control

ANTI RUST HIGH TENSILE STEEL CLADDING

- Deep ribbed 0.3mm steel
- Roll formed in NZ
- Guaranteed for 20 years

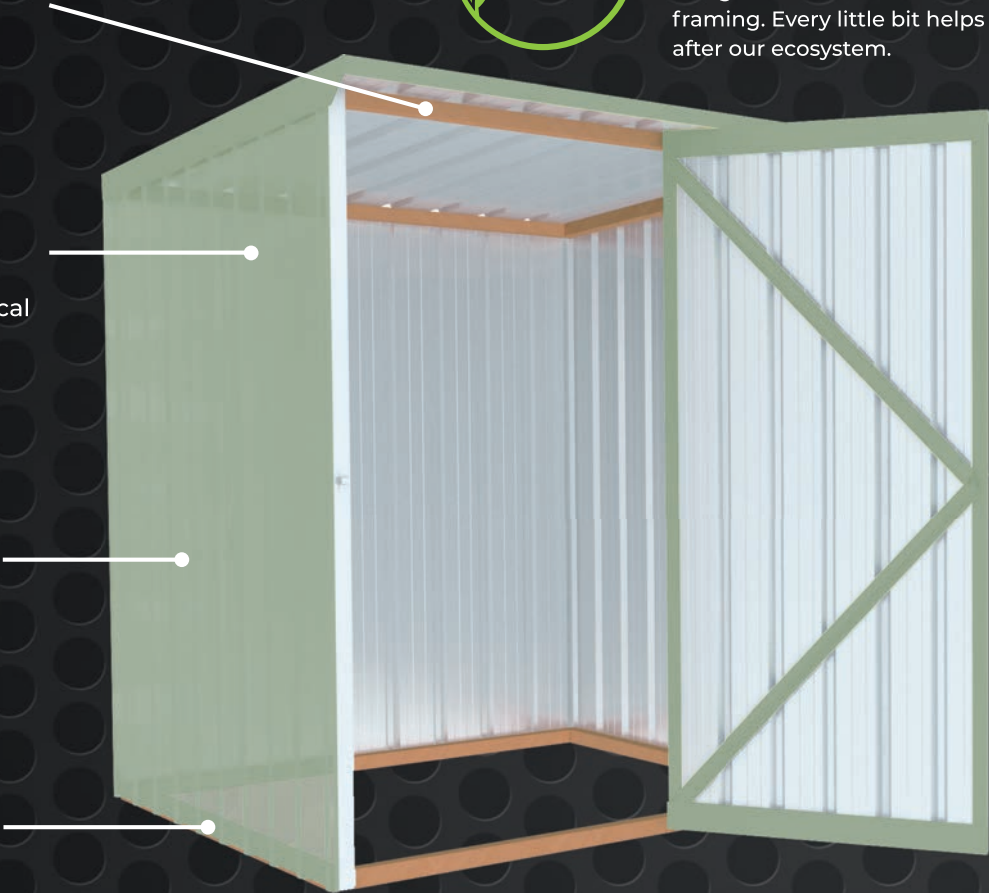

ADVANCED WATER RUN OFF

- No steel channels
- Water flows away freely
- Prevents leaks and corrosion

ENVIRONMENTALLY RESPONSIBLE

Helping our environment through using a renewable resource for the framing. Every little bit helps in looking after our ecosystem.

MORE STRENGTH, EASY ASSEMBLY, BETTER WEATHER PROOFING AND SUPERIOR VALUE FOR MONEY.

DOOR & HALF SYSTEM

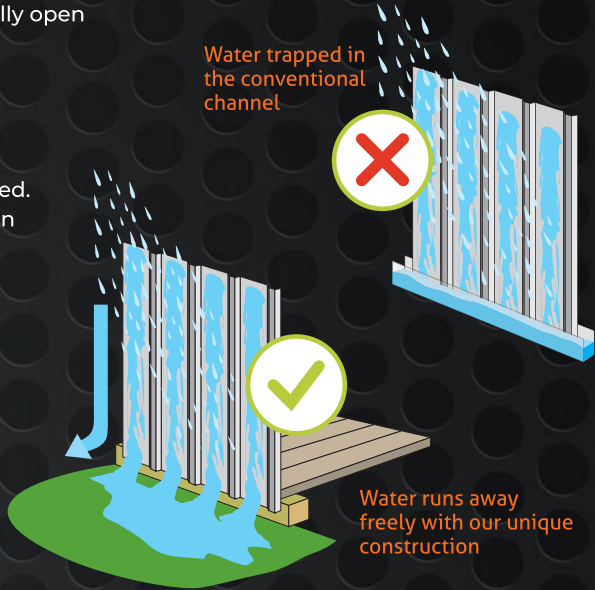

This double door system creates a single large door for easy everyday access, and an extra smaller door that opens up for the larger items such as ride on mowers, bikes & kayaks.

- Wide double door opening for easy access
- Width of more than 1.4 metres with the doors fully open

ADVANCED WATER RUN OFF

As with all buildings, it is important that water flows away from your garden shed. Trapped water can potentially allow water ingress and then ultimately, corrosion of the steel cladding. Unlike many other sheds, the Duratuf Guardian shed does not have steel channels at the base of the wall. This allows water to drain away unimpeded.

Further to this, when mounting your Guardian shed on a raised concrete floor pad, the assembly can be done in such a way that the steel wall sheets overlap the concrete floor for ultimate weather proofing. Further info on this in the Assembly Instructions.

ANTI-RUST STEEL CLADDING

The Duratuf Guardian sheds feature a hi-tensile, deep ribbed 0.30 gauge steel cladding. Roll-formed in our factory in Hamilton, New Zealand, it is available in a classic non-rust Zinc/Aluminium finish, or your choice of four popular colour options (See page 3 for all colour options).

For your further peace of mind, the Guardian shed is backed up by a full 20 Year Warranty on all steel cladding. (Conditions apply)

EASY 4 STEP ASSEMBLY SYSTEM

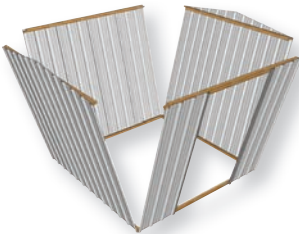

STEP 1

Construct wall and door panels using the hardware supplied.

STEP 2

Stand up wall panels. Lock timber frame together and fix at corners.

STEP 3

Fix roof in place using weatherseal nails provided.

STEP 4

Fit floor and anchor shed.

OPTIONAL EASY TIMBER FLOOR KITS

Optional timber floor kits are a good way to create a clean, dry platform up off the ground for storing your valuable gear on. Guardian floor kits work differently to most other garden shed floors. The floor is fixed inside the shed on the timber bottom plate, creating a strong base for the shed.

The Guardian floor kit contains all the materials that you will need including H4 ground treated joists and floorboards (cut to size) as well as the hardware required.

OPTIONAL CLEAR ROOF PANELS

The double sided clear roof panel provides UV free natural daylight for your Guardian garden shed or Workshop. For the gable shed range it includes two single clear roof panels to cover both sides of the central ridge beam for additional light. These clear roof panels are ideal for the larger garden sheds or for those who are using their garden shed as a work space. Please note that clear panels may condensate more than steel.

3 Easy Steps To Choose The Perfect Shed!

1. CHOOSE YOUR SIZE & ROOF STYLE

Skillion Roof

Roof slopes to the front - ideal for up against the house to ensure that any rainwater runs to the front.

1.690 W x 0.685 D (M)
MODEL: GS62 PAGE: 7

2.190 W x 0.685 D (M)
MODEL: GS72 PAGE: 7

1.690 W x 1.020 D (M)
MODEL: GS63 PAGE: 7

2.190 W x 1.020 D (M)
MODEL: GS73 PAGE: 7

Lean-To Roof

Roof slopes to the rear - perfect for against the fence or in the open as water runs away from the door area.

1.020 W x 2.020 D (M)
MODEL: GL37 PAGE: 9

1.520 W x 2.020 D (M)
MODEL: GL57 PAGE: 9

2. CHOOSE YOUR COLOUR

Roll-formed right here in New Zealand, the steel cladding is available in a classic non-rust Zinc/Aluminium finish, or your choice of four popular colour options.

Zinc/Aluminium

Mist Green

Ironsand

Grey Friars

Ebony

Colours may vary from illustrations.

3. CHOOSE YOUR ACCESORIES

Looking for an upgrade?

Now that you have decided on the size and colour of your Guardian shed, you can choose from our range of accessories.

The choice of floor is important. Do you need a concrete pad or is the Duratuf Timber Floor Kit the better option? See page 10 for flooring options, and all other accessories are found on page 15.

SKILLION ROOF SERIES

Roof slopes to the front - ideal for up against the house to ensure that any rainwater runs to the front.

Brilliant space saving solution.

Need storage against the house or hard against the fence? The Duratuf Guardian Skillion series has a roof that slopes to the front and enables it to sit hard against the wall. Great for storing a large range of household items.

LEAN-TO ROOF SERIES

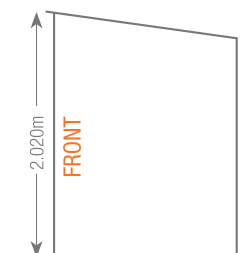

Roof slopes to the rear – perfect for against the fence or in the open as water runs away from the door area.

Available in six practical and popular sizes.

The Duratuf Lean-To Roof series has a sloping roof that ensures that rain-water doesn't pool like on a flat roof. Water run-off is to the rear. A generous front wall height gives plenty of head clearance and 920mm wide single door or a 1420mm double door opening option creating a roomy and spacious interior.

Utilise Wasted Space

Do you have a spot in your backyard that is wasted and just growing weeds and filling up with junk? Turn it into valuable dry storage space now with new Guardian "Narrow" shed models.

RECOMMENDED FLOORING OPTIONS

Timber Floor Kit Option

Guardian sheds have the option of a pre-cut H3 treated timber floor kit.

This floor sits up on the 45mm H4 treated base plate keeping your gear elevated above any damp surface. Guardian timber floors make an excellent base, are quick to install and give excellent rigidity to the whole shed.

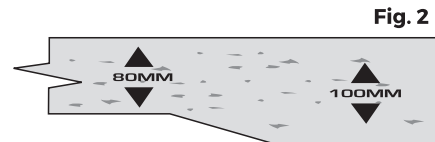

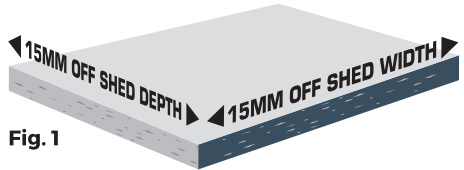

Timber Floor Option

Concrete Pad Option

Nothing is more versatile than a Guardian shed should you choose to pour a raised concrete base. Simply follow the instructions through the installation process to elevate the bottom timber plate. This will enable the wall cladding to protrude below the base plate, stopping water flowing inside the shed and ensuring a weather tight pad.

Note - Ensure that the base substrate is compacted firmly. We suggest that the slab should be 80mm thick in the middle and 100mm thick around the edges (Fig 2).

The raised slab size should be 15mm smaller than the overall base size of the shed and at least 30mm above the ground line (Fig 1).

Concrete Pad Option

GABLE ROOF SERIES

Slopes away from the centre – the strongest option for larger sheds, whilst also providing extra headroom in the centre.

Need more space for bigger gear?

The Duratuf Guardian Gable sheds are available in sizes as big as 3.190m x 3.020m, and with the gable roof there is even more head room! Stash your bike, your BBQ or your fishing gear. There is plenty of room for this, and more!

Big On Roof Strength

With bigger garden sheds, it's especially important that they have a strong framing system to support the larger walls and the bigger roof span.

The Guardian gable roofed sheds not only have the timber wall frames for strength, but also a strong timber ridge beam structure to support the bigger span. Don't settle for anything less!

OPTIONAL ACCESSORIES

*Optional extras may incur freight charges when ordered separately.

TIMBER FLOOR KIT

Designed to fit snugly inside your Guardian shed, the floor kit includes all materials and fixings needed for easy installation.

SKU: 235282

PEG DOWN KIT

Used to anchor your Guardian shed down to sand or soil substrates.
Kit includes 6 x H5 pegs and stainless steel screws. Tools required; Sledge hammer and screwdriver.

SKU: 235283

BOLT DOWN KIT

The Duratuf Bolt-down kit is used to mount your Guardian shed securely to a concrete base, with a unique bracket which tightly clamps the base plate to the concrete floor. All fixings included.

CLEAR ROOF PANEL

Provides UV free, natural daylight and fits in place with one steel roof sheet.
Please note that clear panels may condensate more than steel.

SKU: 235284

5 TIER SHELF UNIT

Bolt free interlocking kitset frame with MDF shelves and 350kg load rating per shelf.
Size: 0.90m W x 0.40m D x 1.80m high.

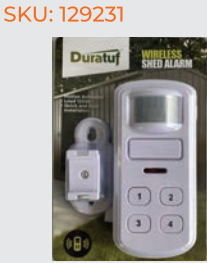

SKU: 235285

HEAVY DUTY WORKBENCH

Lock together construction with MDF shelves.
Size: 1.14m W x 0.50m D x 0.90m H.

SKU: 129231

SHED ALARM

- Ultra loud 130db alarm
- 60 degree infrared beam detects movement up to 6 metres away
- Easy to program 4 digit code
- Uses 4 x AA Batteries (not included)
